

Join the Knowledge and Innovation Interest Group

This Knowledge and Innovation Interest Group focuses on how managers can best leverage the knowledge base of their organizations in order to build competitive advantages for their firms. Some of the questions of interest to this group include: What is organizational knowledge? Where does it reside? How does organizational learning take place and how does it feed into knowledge? What is the link between learning and innovation? How is knowledge shared and transmitted within and among organizations? How can knowledge, learning, and innovation be managed better?
