

AE First Name	AE Last Name	Topic keywords	Methods keywords
Sharon	Belenzon	Innovation, intellectual property, corporate governance, business groups, family firms	Panel data, matching models, machine learning and AI
Heather	Berry	Product and geographic diversification, global innovation, divestment, global sourcing, multinational firms	Panel data, dynamic panel estimators, survival analysis
Seth	Carnahan	Human capital, employee mobility, inequality, entrepreneurship, gender	Panel data, employer-employee linked data, U.S. Census data, difference in difference, instrumental variables
Gino	Cattani	Creativity/innovation, legitimacy/social evaluation, network theory, evolutionary theory, market categories	Panel data, matching methods, simulation, historical case studies, social network analysis
Raffaele	Conti	Innovation, entrepreneurship, intellectual property, institutional environment	Quasi-experimental methods, panel data, diff-in-diff regressions, instrumental variables, matching
Donal	Crilly	Behavioral strategy, stakeholder strategy, non-market strategy, global strategy	Experiments, configurational analysis (QCA), survey methods, textual analysis
Cristian	Dezso	CEOs/top management, gender diversity in organizations, corporate governance, human capital, competitive strategy	Panel data, experimental methods, game theory, formal models
Giada	Di Stefano	Knowledge, organizational learning, social norms, status/reputation, innovation	Experimental methods, mixed methods, qualitative methods, laboratory experiments, field experiments
Rudy	Durand	Status/legitimacy/reputation, institutional and evolutionary theories, market categories and optimal distinctiveness, deviance/differentiation/conformity,	Panel data, instrumental variables, experiments, matching methods, replications
Emilie	Feldman	Corporate strategy, mergers and acquisitions, divestitures, corporate governance, CEOs/top management teams	Panel data, propensity score matching, coarsened exact matching, event studies
Caroline	Flammer	Corporate governance, corporate social responsibility, impact investing, non-market strategy, short-termism	Panel data, difference-in-differences, instrumental variables, regression discontinuity, event studies, replications
Isin	Guler	Organizational learning, social networks, innovation strategy, entrepreneurship and venture capital, resource allocation	Panel data, event history analysis, social network analysis
Ben	Hallen	Entrepreneurship, entrepreneurial finance, venture scaling, interorganizational networks, technology strategy	Qualitative data analysis, multi-case studies, mixed methods, social networks
Olga	Hawn	Sustainability, corporate social responsibility, non-market strategy, M&A, global strategy	Panel data, differences-in-differences, matching models, event studies, content analysis, qualitative research
Karin	Hoisl	Innovation, knowledge, creativity, gender, intellectual property	Panel data, identification, conjoint experiments
Ioannis	Ioannou	Sustainability, corporate social responsibility, stakeholder theory, capital markets, investment analysts	Panel data, instrumental variables, matching models, survival analysis, replications
Nan	Jia	Non-market strategy, corporate political strategy, institutional environment, business and politics, innovation	Panel data, large-sample observational data, field experiments
Rahul	Kapoor	Technology strategy, technological change, business ecosystems, industry evolution	Quantitative methods, mixed methods
Aseem	Kaul	Corporate strategy, technology strategy, non-market strategy, organizational & institutional economics, global strategy	Mathematical models, panel data, large-sample observational data, replications
Dovev	Lavie	Inter-organizational relationships, exploration and exploitation/ambidexterity, competitive dynamics, resource-based view and capabilities, value creation and capture	Panel data, quantitative data analysis
Jiao	Luo	Corporate social responsibility, non-market strategy, social impact, cooperatives and hybrid organizational forms, institutional environment	Panel data, large-sample observational data, mathematical models
Tomasz	Obloj	Agency theory, behavioral strategy, organization design, incentives, human capital	Panel data, field experiments, mathematical models, replications
Claudio	Panico	Organizational economics, industrial organization economics, inter-organizational relationships and contracts, platforms, human capital	Mathematical models, game theory, theory of incentives, simulation models
Sun-Hyun	Park	corporate governance, strategic leadership (CEO/board, diversity), market intermediaries, institutional environment, emerging markets	panel data, text analysis, social network analysis, historical case studies
Hart	Posen	Organizational learning, Imitation, innovation, entrepreneurship, behavioral strategy, real options	Computational models (bandit, NK), panel data, experiments
Tim	Quigley	Upper echelons theory, strategic leadership, corporate governance, CEOs and top management teams, agency theory	Panel data, sample selection models, event studies, event history, variance partitioning and multi-level models, replications

Evan	Rawley	Corporate strategy, transaction cost economics, agglomeration effects, entrepreneurial spawning, teams	Panel data, differences-in-differences, instrumental variables, propensity score matching, coarsened exact matching
David	Ross	Governance, gender, diversity, formal foundations, entrepreneurship	Panel data, event studies, econometrics, game theory, nonparametric statistics
Evan	Starr	Strategic human capital, employee mobility and entrepreneurship, innovation, empirical methods	Strategic human capital, employee mobility and entrepreneurship, innovation, empirical methods
Andrew	Shipilov	Networks, inter-organizational relationships, status, diffusion, performance feedback	Panel data, time series data analysis, network analysis, replications
Bart	Vanneste	Corporate strategy, mergers and acquisitions, interorganizational relationships, trust	Panel data, machine learning, variance decomposition, simulations, replications
Bala	Vissa	Entrepreneurship, venture capital, behavioral theory, business groups, emerging markets	Panel data, quantitative data analysis, field experiments
Dan	Wang	Social networks, social movements and activism, entrepreneurship, venture capital, geographic mobility and migration	Social network analysis, panel data, text analysis, mixed methods, event history models
Anthea	Zhang	Corporate governance, upper echelons, CEO succession, emerging market strategy, global strategy	Event history analysis, event studies, panel data
Minyuan	Zhao	Innovation, intellectual property, global strategy, multinational firms, non-market strategy	Count data models, panel data, quantitative data analysis
Yue (Maggie)	Zhou	Corporate strategy, theory of the firm, multinational firms, organization structure, competitive strategy	Panel data, survival analysis, event studies, game theory, industrial organization economics models
